Discussion Topics
Discussion Topic

With regard to fuel storage and transmission what are considerations that Pools and their members should take into account?
Discussion Topic

How can a Risk Pool ensure that they are capturing their fleet exposures and adequately underwriting that risk?
Discussion Topic

When a member is deploying new technology/service types to fleet operations, what role can/should the pool play in the process and how do we ensure that occurs?
Discussion Topic

Training is an important factor in mitigating risk in fleet operations, the obvious being adequate driver training.

Beyond this what other types of training are necessary and how can the pool support and encourage these efforts?
Discussion Topic

As we are seeing more non-traditional technologies entering fleets, (alternate fuels, AV, connected diagnostics, etc.), what things should pools and their members be considering to manage their fleet risk?
Questions?
